

Integrate the Jira with this existing codebase

Activity: Integrate the AI Agent with Jira by adding a "Connect Jira" feature that allows users to establish a connection using their Jira Base URL, Email ID, and Jira API Token. Once the connection is successfully established, retrieve and populate the available Jira user stories within the application. Ensure the implementation follows the existing project architecture, UI design, and coding standards while maintaining compatibility with the current functionality.

Implement the UI Changes

- Created a CONNECT JIRA button on top right corner
- Created FETCH JIRA User story to list/fetch all the user stories

The screenshot shows a web application titled "User Story to Tests" with a subtitle "Turn user stories into comprehensive, structured test cases in seconds." The interface includes a "Connect Jira" button and a "Reset" button. Below these, there is a section titled "Fetch JIRA Userstory" with a description "Connect Jira to load user stories into the generator." The main form has two input fields: "Story Title" and "Summary", both with placeholder text "Enter the user story title..." and "Enter a summary of the user story..." respectively. To the right of the form, there is a green box with a test tube icon and the text "Your test cases will appear here" and "Fill in the story details on the left and hit Generate. We'll craft positive, negative, edge, and more test cases for".

Then Implement the Connectivity

- Connectivity implemented in the env file for front end

```
user-story-to-tests-updated-ui > frontend > .env
1 # Frontend API Configuration
2 # Use the same port as defined in the root .env file
3 VITE_API_BASE_URL=http://localhost:8090/api
4 VITE_JIRA_BASE_URL=https://archanam40.atlassian.net
5 VITE_JIRA_EMAIL=
6 VITE_JIRA_API_KEY=
```

Fetches all the list of user stories

AI-Powered Test Generation

User Story to Tests

Reset

Turn user stories into comprehensive, structured test cases in seconds.

Fetch JIRA Userstory

Connected securely

Connect Jira to load user stories into the generator.

50 stories

50 stories

Story Title *

SCRUM-8: Reports View Reports Others

Summary *

Reports View Reports Others

Description

As a user, I want to reports view reports others so that the related functionality works as expected.

Acceptance Criteria *

Given reports exist in the system, when a user views or generates a report, then the report should display accurate and up-to-date information.

Story Title *

SCRUM-8: Reports View Reports Others

Summary *

Reports View Reports Others

Description

As a user, I want to reports view reports others so that the related functionality works as expected.

Acceptance Criteria *

Given reports exist in the system, when a user views or generates a report, then the report should display accurate and up-to-date information.

Generated Test Cases

12 test case(s)

Model: openai/gpt-oss-120b

Tokens: 1980

TEST CASE ID	TITLE	CATEGORY	EXPECTED RESULT
▶ TC-001	View existing report with valid permissions	Positive	The selected report opens and displays accurate, up-to-date information matching the data in the system
▶ TC-002	Generate a new report with default parameters	Positive	A new report is generated within the expected time frame and displays correct data reflecting the current

Test Steps for TC-001

STEP ID	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
S01	Log in as a user with report view permissions	N/A	Step completed successfully
S02	Navigate to the Reports section	N/A	Step completed successfully
S03	Select an existing report from the list	N/A	Step completed successfully
S04	Click the "View" button	N/A	The selected report opens and displays accurate, up-to-date information matching the data in the system

- If clicks on Reset, then the field values are wiped off.
